

CASE STUDY

GELATINE CAPSULE DRYING TUNNELS

Softgel drying tunnels require precise humidity control to ensure the target water content of the capsules is maintained, preserving the quality of the capsule shell.

END USER: Leader in the development and manufacturing of soft gelatin nutritional supplements, offering softgels in any size, shape and color.

Munters ICA-1000 Desiccant Dehumidifier

KeRi Engineering and ICE worked together to design a 5,117 CFM Munters desiccant system delivering air @ 5.5 gr/lb. The Munters ICA unit was integrated into a closed-loop bypass system that ensured the target dewpoint condition could be provided on-demand.

Industrial Conditioning Equipment (ICE) is a manufacturer's representative for some of the highest quality industrial air treatment equipment manufactured in the industry.

KeRi Engineering PC is multi-discipline, full-service Engineering firm offering Mechanical, Plumbing, Fire Protection, Electrical, and Sustainable solutions to Pharmaceutical, Healthcare, Commercial & Institutional Facilities...

Munters Corporation is a global leader in the manufacturing of industrial desiccant dehumidification systems down to -90F dewpoint.
