

BROCHURE

PHARMACEUTICAL & NUTRACEUTICAL

INDUSTRIAL CONDITIONING EQUIPMENT (ICE) offers energy efficient custom-designed dehumidification solutions for every area of pharmaceutical & nutraceutical production.

Who We Have Worked With

Consistent & effective climate control is an important factor for stable and predictable production. From R&D labs to bulk production, humidity can affect both the chemical and mechanical properties of formulations, which can lead to quality issues and Good Manufacturing Practice (GMP) challenges. Laboratory and pharmaceutical product dehumidification systems can be the right solution to help prevent moisture issues during the production process for tablets, capsules, powders, and strips.

ADVANTAGES WITH MUNTERS SYSTEMS

Munters provides optimal environmental conditions throughout the production process.

1. Dry Storage
2. Cleanroom & R&D
3. Drying

4. Weighing/Mixing/Granulating
5. Milling & Compressing/Tableting
6. Coating

7. Vaccines and Parenteral
8. Packaging
9. Storage
